INDEX OF ABSTRACTS

Volume 11 (1982)

ABBOTT, R. D., CARROLL, Raymond J., SPIEGELMAN, C. H., LAN, K. K. G., and BAILEY, K. T. Errors-in-variables for binary regression models, 82t-109.

ABDEL-HAMEED, Mohammed. Covariance inequalities and bounds for a class of multivariate strongly unimodal distributions, 82t-104; Pure jump damage processes, 82t-103.

ABDELHAMID, Sami N. On estimation via optimal stochastic approximation procedures, 180-10.

ABOUAMMOH, A. M. and MASHHOUR, A. F. On some closure properties of unimodal discrete distributions, 82t-86.

AERTS, Marc and CALLAERT, Herman. The exact approximation order in the central limit theorem for random U-statistics, 82t-44.

AHSANULLAH, Mohammad. Exponential distribution and its record values, 181-20; Record values of the geometric distribution, 179-19.

AKRITAS, Michael G. Empirical processes associated with V-statistics and a class of estimators under random censoring, 182-69.

ALDOUS, David J., Characterizing stochastic processes invariant under a family of transformations: some generalizations of exchangeability, 181-6.

ALEXANDER, Kenneth S. Central limit theorems for weighted empirical processes (preliminary report), 82t-21; An exponential bound, central limit theorem, and LIL for non-IID empirical processes (preliminary report), 82t-22; On the behavior of empirical measures (preliminary report), 182-44.

ALI, M. Masoom, SALEH, A. K. Md. Ehsanes and UMBACH, Dale. Large sample estimation of Pareto quantiles using selected order statistics, 182-16.

ALI, Mir M. Exact distribution of linear combination of order statistics from the exponential population, 181-31.

ALI, Mir M. and PONNAPALLI, R. An optimum property of Gauss-Markoff estimates when errors have elliptic distribution, 182-43.

AMMANN, Larry P. Conditional Laplace transforms for Bayesian nonparametric inference in reliability theory, 82t-39.

ANDERSEN, Per Kragh. On the application of the theory of counting processes in the statistical analysis of censored survival data, 178-27.

ANDERSON, T. W. and PERLMAN, M. D. On a consistency property of invariant tests for the multivariate analysis of variance and related problems, 82t-112.

ARNOLD, Barry C. and BROCKETT, Patrick L. Identifiability for dependent multiple decrement/competing risk models, 181-13.

ARNOLD, Steven F. Sufficiency and invariance, 182-41.

ATHREYA, Krishna, GHOSH, Malay and LOW, Leone Y. Laws of large numbers for bootstrapped means and U-statistics, 178-26.

ATKINSON, Bruce W. Germ fields and a converse to the strong Markov property, 82t-75.

ATWOOD, Corwin L. Approximate tolerance intervals, based on maximum likelihood estimates, 182-23.

BABU, G. Jogesh and SINGH, Kesar. Asymptotic representations for jackknife and bootstrap on L-statistics, 82t-71.

BAILEY, K. T., CARROLL, Raymond J., SPIEGELMAN, C. H., LAN, K. K. G., and ABBOTT, R. D. Errors-in-variables for binary regression models, 82t-109.

BAKER, Joshua and WEHRLY, Thomas E. Estimation for filtered Poisson processes (preliminary report), 182-62.

BAR-LEV, Shaul K. A characterization of certain statistics in exponential models whose distributions depend on a sub-vector of parameters only, 182-25.

BARLOW, Richard E. A Bayesian approach to survival analysis, 178-24.

BARTOSZYŃSKI, Robert, BROWN, Barry W. and THOMPSON, James R. Some model theoretic considerations of metastatic progression, 182-40.

BASAWA, I. V. Some applications of Bahadur large deviation results for non-ergodic curved and mixed exponential families, 82t-28; Some recent developments in asymptotic optimal inference for stochastic processes, 179-5.

BASU, A. K. Invariance principles for U-statistics and Von Mises' differentiable functions, 82t-24.

BASU, Asit P. and EBRAHIMI, Nader. Distributions with a new aging property, 182-61.

BASU. Asit P. and GHOSH, J. K. Locally most powerful rank tests for censored data, 179-28.

BEDER, Jay H. Estimating the "covariance factor" of a Gaussian process, 181-17.

BELINSKY, M. A characterization of sufficiency for the mixing proportion of a mixture of two probability functions (preliminary report), 180-14.

BELL, William R. Nonstationary time series: generation and signal extraction, 182-55.

BENNETT, G. and CONSTANTINE, G. On an extremal spectral property of S-matrices, 82t-29.

BERA, A. and JOHN, S. Tests for multivariate normality with Pearson alternatives (preliminary report), 82t-70.

BERAN, R. J. Jackknife approximations to bootstrap estimates, 181-14.

BERGER, Agnes. On comparing survival probabilities from discrete observations under unequal censoring, 82t-35.

BERGER, Roger L. Testing whether one regression function is larger than another, 180-5.

BERGER, Roger L. and KIM, Jee Soo. Subset selection procedures for exponential populations using type-1 censored data (preliminary report), 180-17.

BERMAN, Simeon M. Sojourns and extremes of stationary processes: recent results, 180-13; Sojourns of stationary processes in rare sets, 182-42.

BERT, M. C., HERKENRATH, U. and THEODORESCU, R. Stationary probability measures for a certain class of non-Markovian models, 82t-51.
